

## FX vol trading screeners

### Weekly RV signals – week of 16 October

A few relevant trading signals for FX vols this week:

- CAD, AUD, PLN, NZD, ZAR vs. USD vols are a buy from a beta-to-vol angle; RUB, CNH, TRY, KRW, JPY are a sell (Figure 4).
- MXN, KRW and BRL are the three flattest USD-vol curves (1y-6m) from a 2-yr z-score (Figure 9) perspective; SEK, ZAR and RUB are the steepest. The analysis linking the shape of FX vol curves to the spot vs. rates differential correlation dynamics (Figure 11, 12) finds that most vol curves are now generally too steep for tenors longer than 6M (JPY, CHF, MXN are the exceptions), leaving the door open for select short FVA trades.
- Within USD/G10, based on the underlying rates vols/correlations (Figures 13, 14), NOK, SEK vols are rich by 2.6, 2.2 vols and CAD, EUR vols are cheap by 1.8, 1.3 vols, respectively. 1y G10 FX USD vols screen as cheap by 2.2 vols (2.0 sigma, Figure 18) relative to rates drivers, as the latter's vols extend their latest drop. Average USD/G10 rates correlation (56% on average) is near the past month's highs (Figure 16); all else being equal, higher rates correlation supports lower FX vol fair values.
- The sharp drop of USD realised correlations is now generally pointing to a premium for selling USD correlation against G10 currencies, and is adding pressure on USD implied corrs to fall as well, although this dynamic is mostly the result of the early August joint sell-off of risk and USD. CAD/NOK, NOK/JPY now show the widest premia coupled with the highest z-scores in implied correlations, offering good sell opportunities. CHF/SEK, AUD/NZD corrs via USD among others offer room to buy (Figure 20). Proxies of average USD implied and especially realised correlations have both come off sharply in recent weeks (Figure 21), due to the repricing higher of JPY and JPY-x vols, with the JPY regaining the status of main pivot currency driving FX moves.
- FX Vols are flat on average over the past week, as per the VXY G7 Index, as there are no new major developments on the geo-political front and 1M tenors are now well within the US election date. On the Gamma segment (Figures 23, 24), higher vols throughout the summer generally point to a wider vol premium for USD/G10 and especially USD/EM pairs. The realisation of 3M skew (from a spot/vol correlation standpoint, not accounting for vol-of-vol and vol corrections) is now more visible than a few weeks back across USD/G10 and USD/EM pairs (Figures 25, 26), thanks to tighter entry points. USD/CAD, USD/SEK, NZD/USD, Precious metals, USD/RUB, USD/TRY (the latter two are both illiquid), USD/PLN, USD/SGD, USD/CNH, USD/IDR are displaying some skew premium based on the above. G10, EM implied vol of vols adjusted higher since the start of the summer, and no longer remain dramatically undervalued relative to long-term averages, after the summer volatility triggered a repricing higher. Implied-realised premia (Figures 27, 28), remain wide on even lower realised vol of vol, putting aside MXN and INR.
- The sentiment model for Gamma trading adds very modestly to FX short-Gamma exposure, having reached the maximum reduction of risk on 5<sup>th</sup>

Investors should consider this report as only a single factor in making their investment decision.

August, as the latest (as of 14th October at day close) average signals are at 88% and 95% of the max Vega budget for USD-vols and EUR-vols (Figures 31, 37). 50% is the threshold at which the long/short version of the model would start taking long-Gamma trades. Among the global variables monitored, none is currently recommending to scale-down risk (Figure 32). The sole deviations from a full short-Gamma allocation are now GBP/USD, NZD/USD, USD/CNH, USD/SGD (signal at 79%) (Figures 29, 35). PnL time series and portfolios statistics show the recent and long-term effectiveness of the filtering approach as applied to USD and EUR vol portfolios (Figures 33, 34, 39, 40) – filtering reduced the recent summer drawdown relative to the short-Gamma benchmark.

- The mean-reversion model signals for 1y ATM vols (Figures 47, 48) favour selling JPY vol vs. EUR, GBP, CHF, CAD, NOK, SEK, AUD, NZD vols; buying CAD vol vs. CHF vol; buying AUD vs. NZD vols; selling MXN, SGD, CNH vols vs. ZAR, PLN, RUB, KRW vols; buying HUF vs. BRL vols. The Vol compression indicator (Figure 45), which measures an average level of dislocation within the FX vol space, is gradually approaching the highest level of the past two years, after having marked the end of the high dislocations regime, following the start of the Ukraine-Russia war, in Q3 2023.
- Page 12 focuses on RV opportunities in the FX vol convexity space (as expressed by 1y fly/ATM vol ratios). Tactically, vol convexity is cheapest on MXN, BRL, RUB and richest on AUD, NZD, GBP (Figure 49). Long-term historical distributions (Figure 53) are now finding G10, EM vol convexity better aligned with historical averages than over the past few months, when they were significantly depressed. Fly-to-vol ratios are now significantly above the early June levels, especially on G10 currencies. Vol convexity remains outright cheap in MXN, BRL, KRW, ZAR, CNH, JPY – all at or below the 7% bottom percentile of their historical distribution. Long-dated convexity offers a better time-decay profile for hedging purposes than short-dated one.

## FX betas vs. vol, carry and skew

**Analyst Certification:** The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

## Important Disclosures

**Company-Specific Disclosures:** Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing [research.disclosure.inquiries@jpmorgan.com](mailto:research.disclosure.inquiries@jpmorgan.com) with your request.

### Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

### J.P. Morgan Equity Research Ratings Distribution, as of October 05, 2024

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	49%	38%	13%
IB clients**	50%	46%	38%
JPMS Equity Research Coverage*	46%	41%	13%
IB clients**	71%	67%	54%

\*Please note that the percentages may not add to 100% because of rounding.

\*\*Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

**Equity Valuation and Risks:** For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email [research.disclosure.inquiries@jpmorgan.com](mailto:research.disclosure.inquiries@jpmorgan.com). For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

**Analysts' Compensation:** The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

**Registration of non-US Analysts:** Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

## Other Disclosures

---

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

**UK MIFID FICC research unbundling exemption:** UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

**General:** Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
