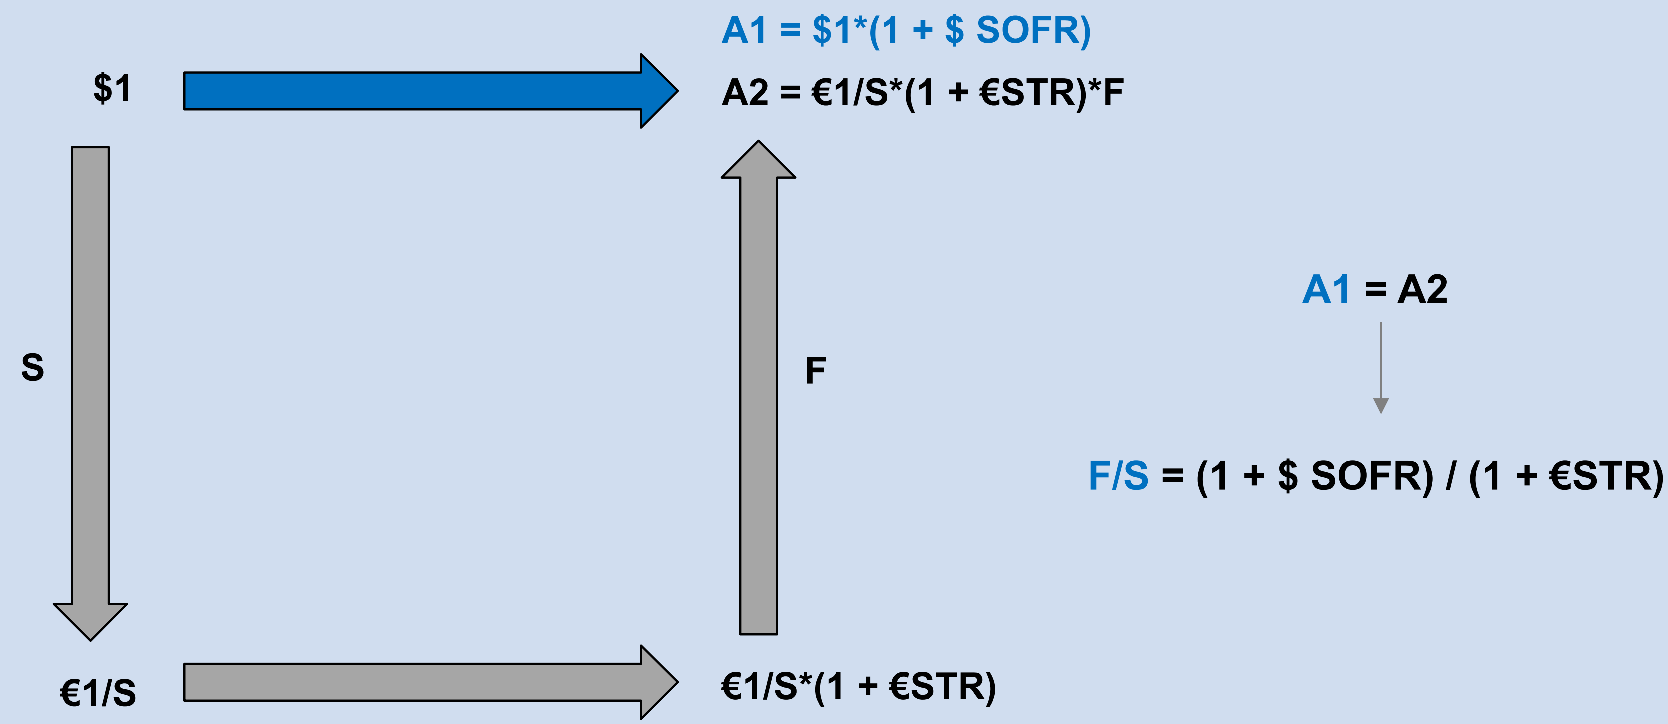
J.P. Morgan Securities plc

See the end pages of this presentation for analyst certification and important disclosures.

Covered interest parity: an arbitrage-able relation between spot FX rate, domestic and foreign interest rates and forward FX rate



- No arbitrage implies A1 = **A2**
- This means that the interest rate differential between the two currencies in the cash money market should **equal** the differential between the forward and spot exchange rates

J.P.Morgan

Terminology

We talk about the **non-USD leg** (non-USD leg is where the spread is applied)

RECEIVE XCCY means RECEIVE the non-USD floating leg

- We want XCCY spread to go MORE negative (or less positive)
- Position is a XCCY <u>WIDENER</u>

PAY XCCY means PAY non-USD leg

- We want XCCY spread to go LESS negative (or more positive)
- Position is a XCCY <u>TIGHTENER</u>

FX FWDS: We are talking about FX FWD SWAPS (a front and back leg -> no spot exposure)

FXOIS is XCCY basis with 2 OIS legs instead of 2 Libor legs

- (Can think about Libor/Libor XCCY and 2 FRA/OIS overlay trades, or FXFWD with OIS rates instead of Libor/Euribor in slide 1)

Day to day funding:

- This refers to the very front end of the FX FWDs curve
- Mainly ON (overnight – the FX swap from today to tomorrow) and TN (TomNext – The FX swap from tomorrow to the day after)
- We can back out the FXOIS using the ON rates in both currencies

Turns:

- Referring to any special day
- Most often referring to Quarter End (QE) turn or Year End (YE) turn, meaning the days over quarter end and year end

Market participants: end user demand creates some market segmentation

Sub 2Y

- **Real money FX forward flows**
  - Funding foreign assets or spot position
- **Fast money XCCY and FX Fwds**
  - Expressing views on funding

3Y – 5Y

- **Issuances** (Corporates + SSAs)
- **Fast money XCCY**
  - Shape of curve/carry trades
  - Issuance trends

5Y – 10Y

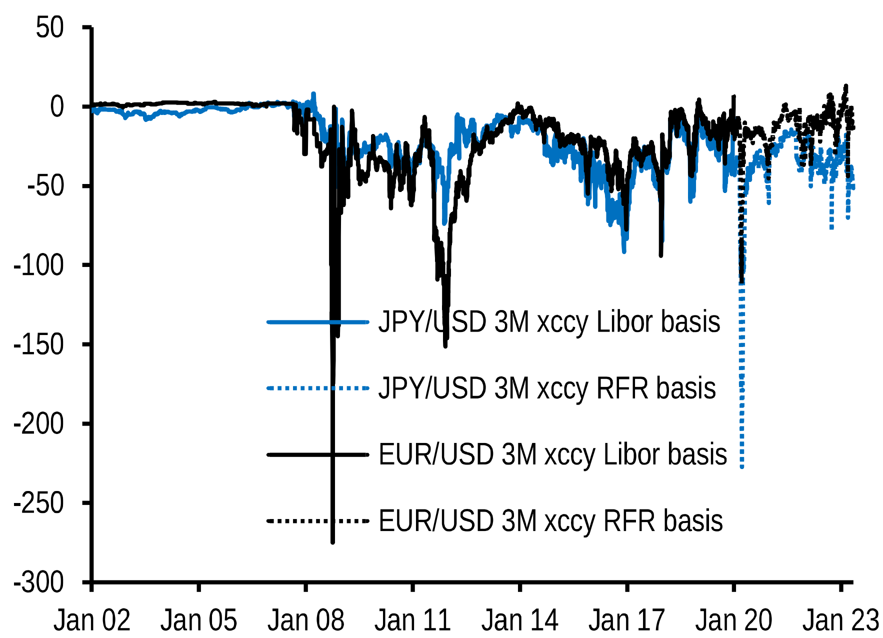
- **Issuances** (Corporates + SSAs)
- **XCCY ASW flows** (real money)

10Y+

- **XCCY ASW flows** (real money)
- **Issuances** (less common)
- **DCU (differential discount unit) / XVA gamma hedging (x-valuation adj.)**
  - CSA related deliveries

Cross currency basis: an indication of scarcity premium

3M EUR/USD and JPY/USD cross currency basis; bp



Ranges of various 3M cross currency bases; bp

		Libor				RFR	
		Jan 2002 - Aug 2007		Sep 2007 - Dec 2019		Jan 2020 - today	
	05 May 23	Min	Max	Min	Max	Min	Max
JPY/USD	-50.4	-8.5	3.3	-91.8	8.3	-227.3	-14.2
EUR/USD	-32.7	-3.0	3.0	-275.0	6.9	-148.4	-10.7
GBP/USD	-13.3	-3.0	4.1	-250.0	17.7	-111.5	13.2

- Prior to the financial crisis, the small deviation from the no arbitrage condition was mostly down to transaction costs and the difference in credit risk for these "*risk-free*" rates
- Following the GFC, the deviation were seen as a reflection of strains in global interbank markets
- The basis indicates the amount by which the interest paid to borrow one currency by swapping it against another differs from the cost of directly borrowing this currency in the cash market. Hence a premium for the "*relative scarcity*" for one currency over the other
- Limits to arbitrage? **Balance sheet space is rented, not free. Increased regulation after the GFC made an additional unit of balance sheet more expensive, effectively widening the no-arbitrage band**

J.P.Morgan

Drivers of cross currency basis: fundamental and technical factors

Myriad drivers of cross currency basis

Drivers	Details
Monetary Policy	Policy rate and balance sheet: The change in relative policy rate and relative excess liquidity between the two currencies could result in a change in scarcity premium of one currency over the other
Risk Aversion	Relative high demand for one currency over the other
Technical	Cross border issuance, higher impact at the long end of the curve
T-bill issuance	Crowding out effect
Other	Year-end effects, balance sheet, regulations

To find common factors driving the global cross-currency basis market, we do the following:

- Run a **standard PCA** of 1Y and 5Y cross currency bases across major currencies (EUR/USD, JPY/USD, GBP/USD RFR cross-currency bases) since Jan 2013
- Search for market variables which are **correlated with the dynamic of the first factor** (which typically explains around 80-90% of the total variance) and thus could be **used to forecast the evolution of the bases**.

Drivers: 1) Interest rate differential

Monetary policy differential has been the most significant driver of the FX OIS bases over the past few years

1Yx1Y €STR/SOFR basis regressed against 1Y (SOFR-€STR) yield differential; since 1 Jan 2020; bp

Regression between the first PCA factor of 1Y FX OIS basis and 1) slope of the USD money market curve (1M/2Yx1M OIS curve) (X1); 2) average slope of the EUR, GBP and JPY money market curve (1M/2Yx1M OIS curve) (X2); 3) S&P index level (X3); and 4) average of 3Mx1Y USD, EUR, GBP and JPY swaption vol (X4); Jan 2017 – Apr 2023; unitless

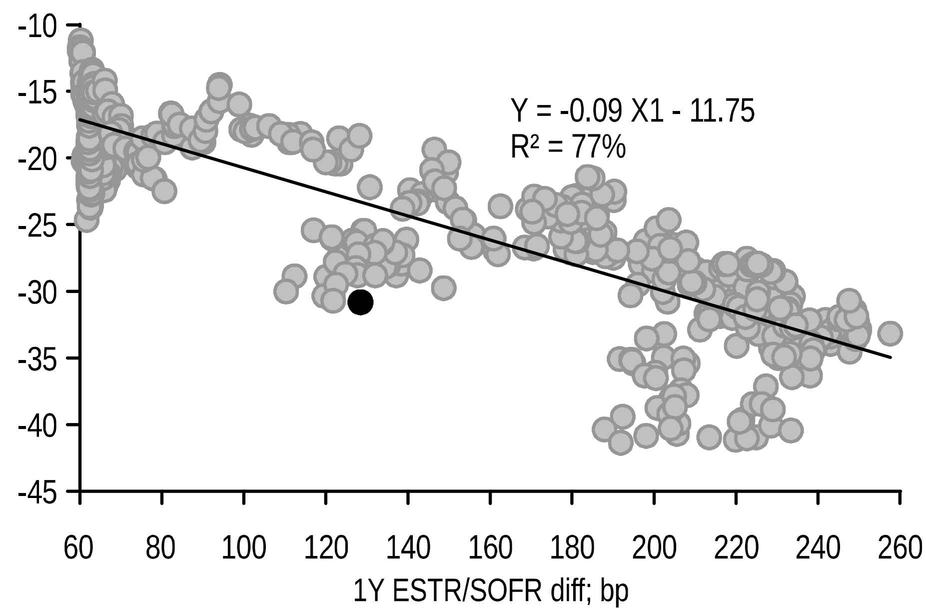
1Yx1Y €STR/SOFR basis regressed against 1Y (SOFR-€STR) yield differential; since 1 Jan 2020; bp



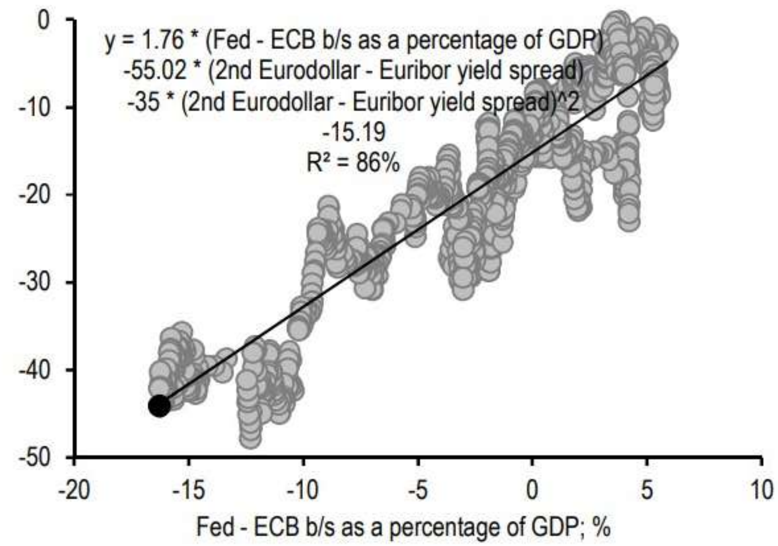
Source: J.P. Morgan

J.P.Morgan

Drivers: 2) Divergence in the relative side of CBs balance sheet as monetary policy turns to large scale assets purchases (vs. Fed's Q

Reds EUR/USD cross currency basis is broadly fair vs. fundamental drivers; we have a front er widening bias on expected balance sheet and rate dynamic with medium term support from yea end considerations

Reds EUR/USD cross currency basis curve regressed against 1) spread between the Fed and the ECB balance sheets expressed as % of GDP and 2) spread between 2nd Eurodollar and 2nd Euribor yield; Aug 2014 - Aug 2017; bp



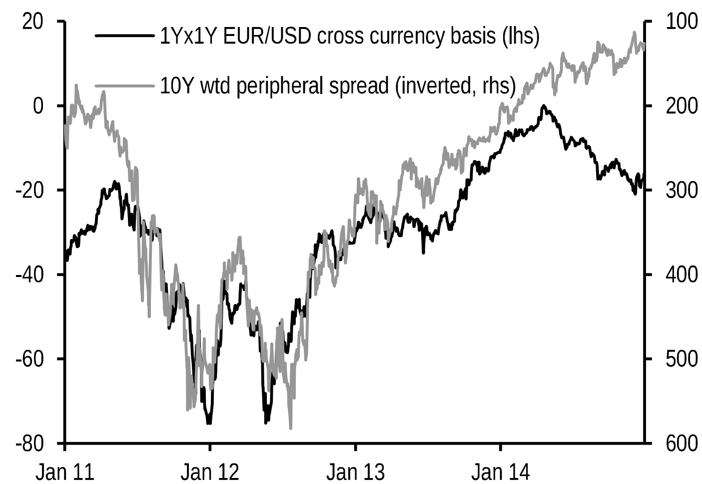
Source: J.P. Morgan

J.P.Morgan

Drivers: 3) Risk aversion: even if not all episodes of flight to quality (and risk aversion) are equal (peripheral vs. COVID crisis)

EUR/USD cross currency basis widened sharply during the peripheral crisis

1Yx1Y EUR/USD cross currency basis (lhs) and 10Y weighted peripheral spreads* (inverted axis, rhs); 2012 - 2016; bp



Source: J.P. Morgan

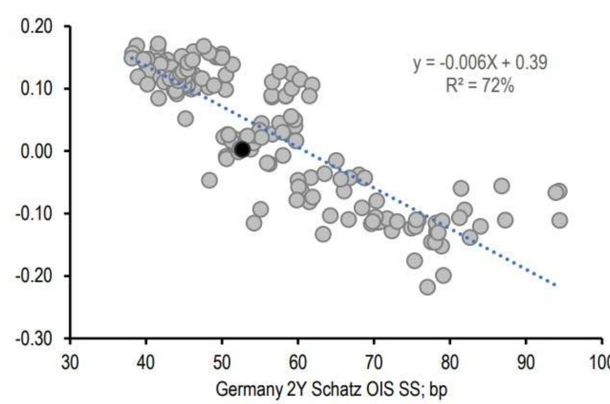
First PCA factor of 1Y FX OIS basis regressed against Schatz €STR swap spread; Sep 2022 – Apr 2023;



Source: J.P. Morgan.

J.P.Morgan

Drivers at the long-end of the curve: 4) Cross-border issuance and cross-border investments

It is attractive to issue reverse-yankee bonds across the curve and these flows should support wider basis

Average adjusted spread between USD and EUR issuance for different rated issuers, adjusted for EUR 3s/6s and EUR/USD cross currency basis; bp

J.P.Morgan

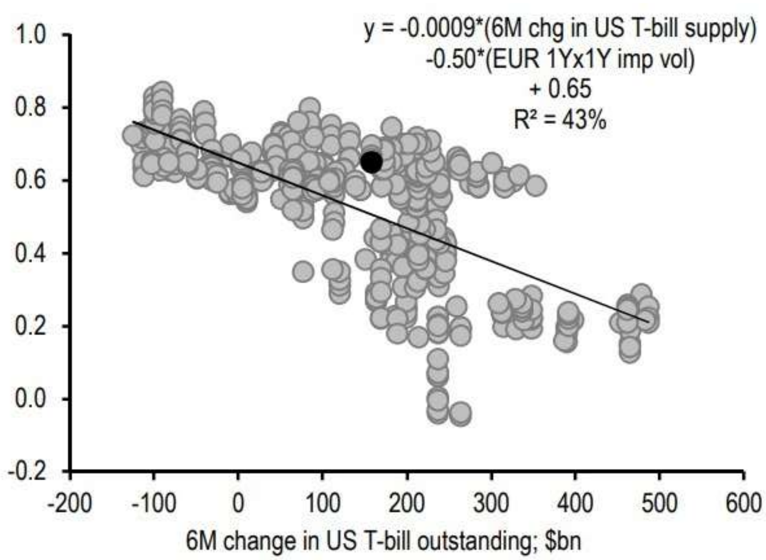
5) T-Bill supply: crowding out effect removes USD from funding market

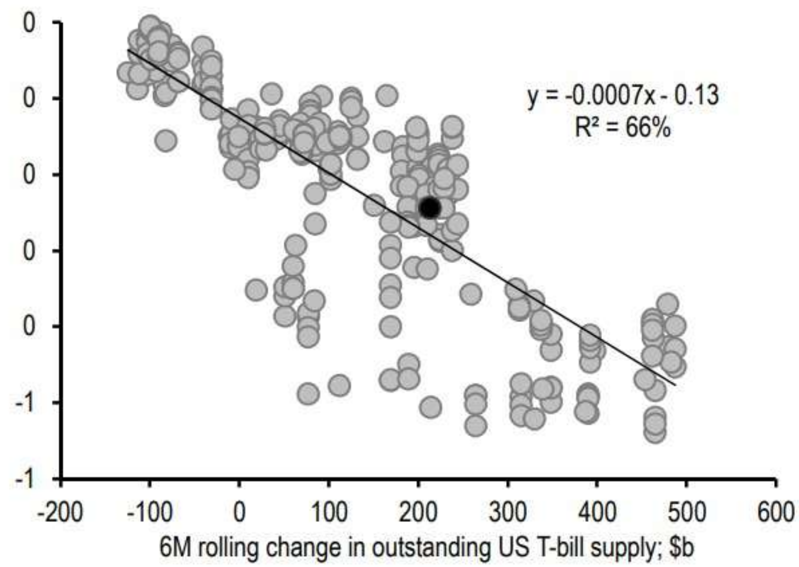
Net T-bill issuance tends to have an effect on cross currency basis mostly via the crowding out channel of USD investment from money market funds

First factor of a 5Y PCA of 1Y global cross currency bases (3 currencies, EUR, GBP and JPY) analysis regressed against the 6M rolling change in US T-bill outstanding supply and 1Yx1Y EUR swaption volatility; Jan 2017 - Jan 2019; bp



Source: J.P. Morgan

First factor of a 5Y PCA of 1Y global cross currency bases (3 currencies, EUR, GBP and JPY) analysis regressed against the 6M rolling change in US T-bill outstanding supply; Mar 2017 – May 2018; bp



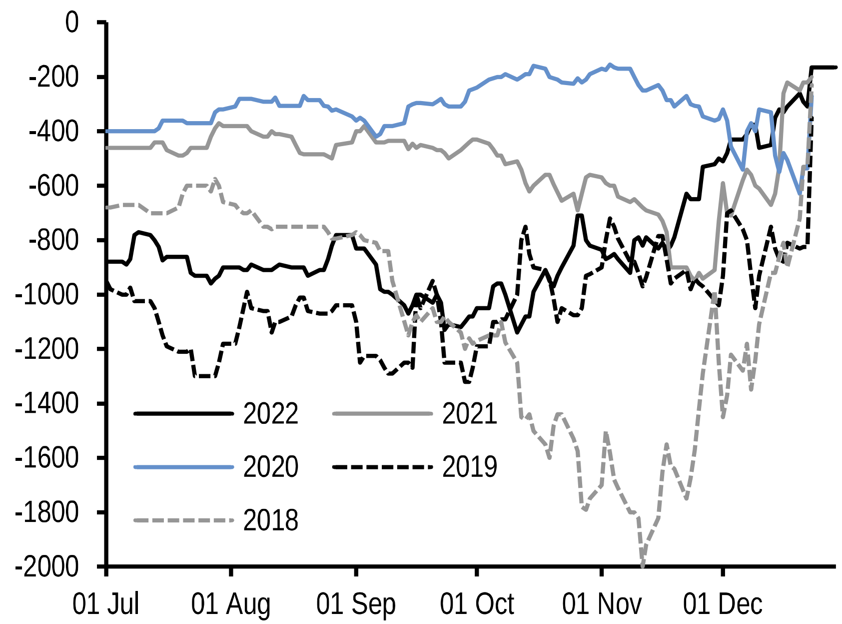
Source: J.P. Morgan

J.P.Morgan

Other drivers: Year-end and quarter-end effects

Typically observe a localized funding pressure in shorter tenors as dollar funding is more expensive over year-end, which can sometimes get exaggerated

Evolution of the EUR/USD Year-end turn over the last few days; bp

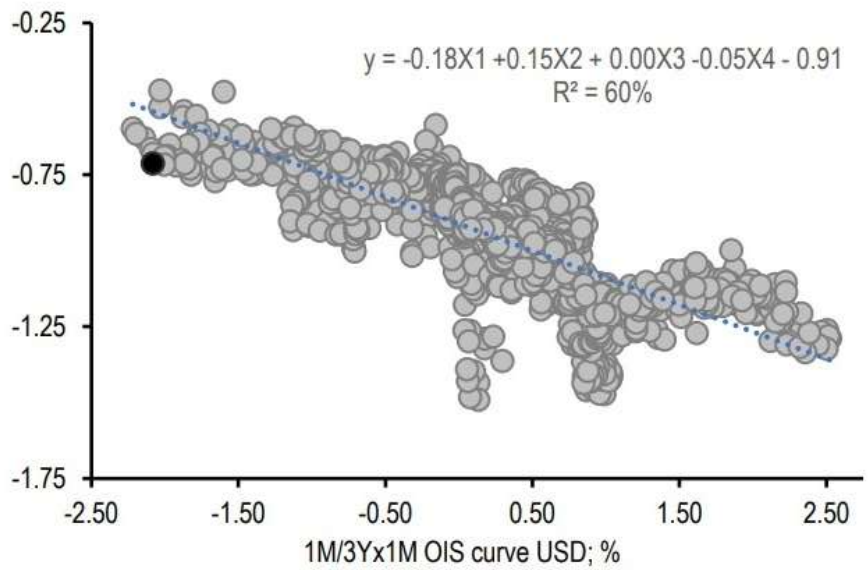


Source: J.P. Morgan

2Q23 Outlook: Biased for further widening in FX bases despite r valuations on risk aversion and relative disinversion of SOFR cu

Cross-currency bases appears too wide versus fundamental drivers

Regression between the first PCA factor of 1Y FX OIS basis and 1) slope of the USD money market curve (1M/2Yx1M OIS curve) (X1); 2) average slope of the EUR, GBP and JPY money market curve (1M/2Yx1M OIS curve) (X2); 3) S&P index level (X3); and 4) average of 3Mx1Y USD, EUR, GBP and JPY swaption vol (X4); Jan 2017 – Apr 2023; unitless



Source: J.P.Morgan

We expect some convergence on money market dynamic further out the curve on Fed limiting imminent easing but more easing to b priced further out for non-US DM central banks as the Fed cutting cycle starts in 2024

Slope of the 1M/2Yx1M OIS curve in USD, EUR and GBP; Jan 2020 – Apr 2023; bp

Source: J.P.Morgan

Expected drivers for cross-currency bases over the near-term

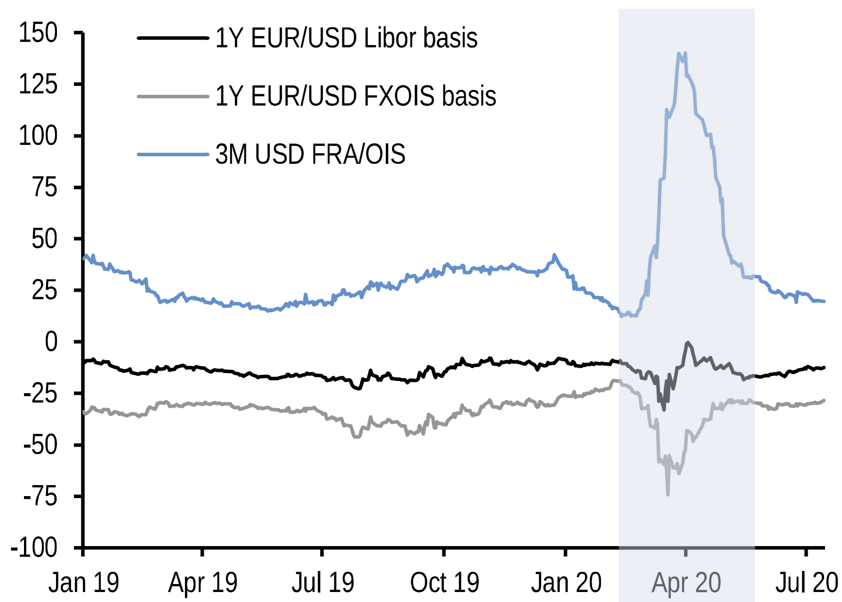
- Relative dis-inversion of the SOFR curve versus other DM money market curves (wideners)
- Risk-off dynamic due to US debt ceiling debate (wideners)
- Large scale issuance of T-bills after debt ceiling debate

J.P.Morgan

What happened to xccy basis during the COVID-19 crisis?

As the crisis erupted the dollar scarcity became more pronounced in FX OIS space whereas the Libor basis was strongly impacted by the relative widening of USD FRA/OIS

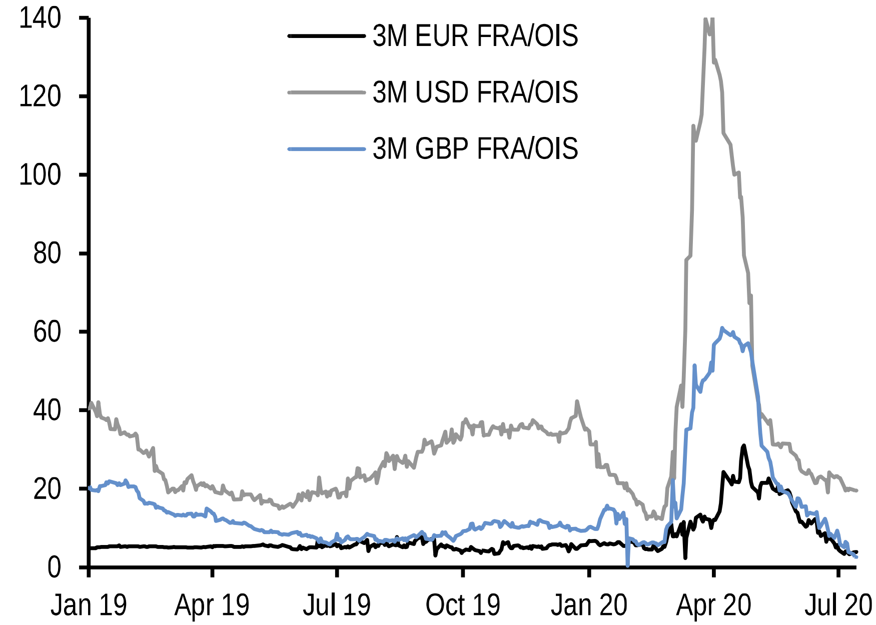
First factor of PCA analysis of short end (1Y) Libor bases (run since January 2013), first factor of PCA analysis of FX OIS bases and 3M USD FRA/OIS; Jan 2019 – Jul 2020; %



Source: J.P. Morgan

The widening in the USD FRA/OIS was of a different order of magnitude relative to the move in the EUR FRA/OIS and more than twice the move in GBP FRA/OIS

Spot 3M USD and EUR FRA/OIS; Jan 2019 – Jul 2020; bp



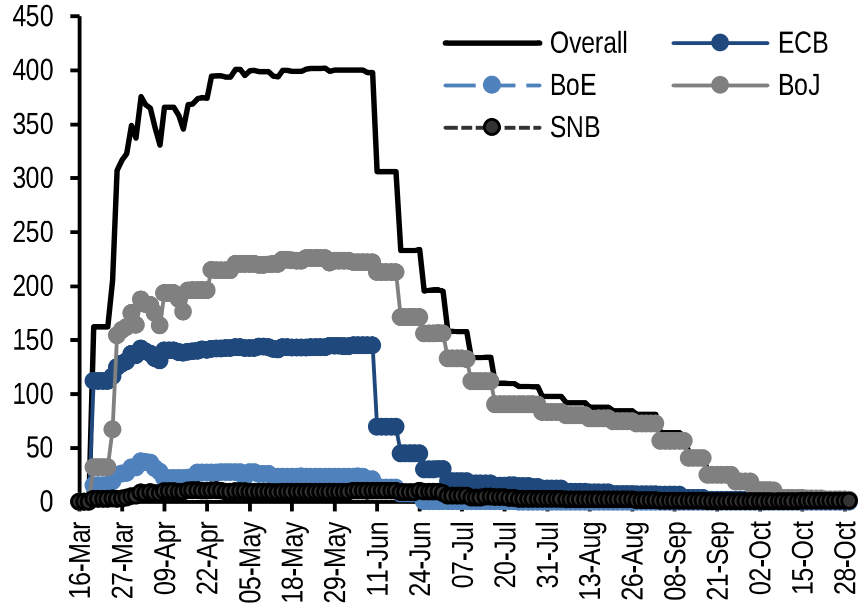
Source: J.P. Morgan

J.P.Morgan

The response from the Fed: the usage of the Fed bilateral swap facility prevented further pressure in the USD funding market

The USD bilateral facility of the FED with DM central banks has strongly contributed to the reduction in short-end USD funding pressure

Overall uptake at the USD bilateral facility with the Fed; $bn



Source: J.P. Morgan

Standing swaplines	BoC, BoE, BoJ, ECB, and SNB	7-day maturity	Increased to daily from 20th March 2023 to atleast until end of April	Provided daily and longer maturity lending operations in the past as well
Other adhoc arrangements	$60bn each with RBA, Banco Central do Brasil, Bank of Korea, MAS, Riksbank	Temporary facilities available through 2020-2021		
	$30bn each with Norges Bank and Danmark Nationalbank			

Cross currency basis – creating synthetic assets

An investor benchmarked to 2Y USTs, can create a **synthetic 2-year Treasury** note by taking advantage of large negative FX basis:

1) **Buy the JGB bond** and asset swaps it into a TONAR Yen floater (net pick up is the asset swap)
   a. Receive Yen TONAR (floating) payments on a quarterly basis

2) **Enters a cross currency basis swap** (pay the cross-currency basis; if the basis is negative, this translates into a pick-up)
   a. Paying Yen TONAR + FX OIS Basis
   b. Receiving USD SOFR

3) **Covert floating rate USD cash flows into fixed cash flows** using plain vanilla IRS (receive fixed rate)
   a) Pay USD SOFR
   b) Receive fixed coupons

Synthetic yield = JGB OIS asset swap spread – FX Basis + USD fixed swap rate =
– 14 – (-65) + 396* = 447bp

Yield pick up (Buy JGB, sell USTs) = Synthetic yield – UST bond yield = 447bp – 400bp = 47bp
= JGB ASW – FX Basis – UST ASW = – 14 – (–65) – (4) = 47bp

*USD swap rate = 2Y UST – ASW = 400bp + (-4)bp = 396bp;

J.P.Morgan

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future

results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
